

July 30, 2019

From the Director's Desk

If there's one thing we can consistently say about NOACSC is we are always changing. We are implementing new technology such as:

- Network Equipment
- Fiscal Redesign Software
- Content Filtering
- New versions of Applications
- Managed Phone Services

But most important, we have great staff. In the last year we have hired four new staff. In Fiscal: Larry Kaiser, Jon Pyles, and Leah Moreland; and a new hire in Student: Paige Hart.

The Student Services team converted Bowling Green from ProgressBook SIS to Powerschool. School year 2019 – 20 will be their second year on Powerschool. Kudos to the Student Services team.

Regarding ProgressBook SIS, release 19.0 is in production. The Student Services team will be conducting their annual Beginning of Year sessions here at NOACSC. Currently 110 district staff will be attending across three sessions.

By the end of CY2019 the Fiscal Team will have 11 districts migrated to State Software Redesign or USXS. Take a deep breath, we have 44 to go after that. If you would like more information regarding our Redesign project and progress, please see the Redesign tab under Fiscal on our web site.

If you would like more information regarding NOACSC, please don't hesitate to call or email me.
