Marking Pattern Mapping 2015-2016

The School Year Initialization process does not copy the Marking Pattern Mapping information to the upcoming school year. Marking Pattern Mapping is used to define how Course History marks are moved from the Sending School to the New School during a student transfer. For more information please see The Student Transfer Step by Step document.

Student Promotion and Bulk Enrollment

After the initial Student Promotion and Bulk enrollment process you will want to periodically rerun the Student Promotion/Bulk Enrollment tasks for the remainder of the current school year to pick up any new students who have enrolled at your district since you first ran the student promotion/bulk enrollment process.

When running this process, it will only pick up the students who were not previously promoted and bulk enrolled into 2015-2016 StudentInformation database.
